

EXPERIMENT 6

PROGRAM:

```
<!DOCTYPE html>
<html>
<head>
  <title>Class Selector Example</title>
  <link rel="stylesheet" type="text/css" href="styles.css">
</head>
<body>
  <h1 class="main-heading">Welcome to Web Development</h1>
  <p class="intro-para">This paragraph is styled using a class selector. It introduces
the
topic.</p>
  <p class="content-para">This is another paragraph with different styling using
another
class.</p>
  <button class="btn-primary">Click Me!</button>
  <button class="btn-secondary">Submit</button>
</body>
</html>
```

styles.css

```
body {
  font-family: Arial, sans-serif;
  background-color: #f5f5f5;
}
.main-heading {
  color: darkgreen;
  text-align: center;
  margin-top: 20px;
}
.intro-para {
  color: navy;
  font-size: 18px;
  padding: 10px;
  background-color: #e0f7fa;
  margin: 20px;
}
.content-para {
  color: maroon;
  font-size: 16px;
  padding: 10px;
  background-color: #ffe0b2;
  margin: 20px;
}
```

```
.btn-primary {  
background-color: royalblue;  
color: white;  
padding: 10px 20px;  
border: none;  
11  
margin: 10px;  
border-radius: 5px;  
cursor: pointer;  
}  
.btn-secondary {  
background-color: darkorange;  
color: white;  
padding: 10px 20px;  
border: none;  
margin: 10px;  
border-radius: 5px;  
cursor: pointer;  
}
```

OUTPUT:

Welcome to Web Development

This paragraph is styled using a class selector. It introduces

EXPERIMENT 7

PROGRAM:

```
<!DOCTYPE html>  
<html>  
<head>  
  <title>Float Positioning Example</title>  
  <link rel="stylesheet" type="text/css" href="style.css">  
</head>  
<body>
```

```
<div class="box-left">
<h2>Left Box</h2>
<p>This box floats to the left side.</p>
</div>
<div class="box-right">
<h2>Right Box</h2>
12
<p>This box floats to the right side.</p>
</div>
</body>
</html>
```

style.css

```
body {
  font-family: Arial, sans-serif;
  margin: 20px;
}
.box-left {
  width: 45%;
  float: left;
  background-color: #add8e6;
  padding: 20px;
  margin-right: 5%;
}
.box-right {
  width: 45%;
  float: left;
  background-color: #f08080;
  padding: 20px;
}
/* Clear floats after the floated elements */
body::after {
  content: "";
  display: table;
  clear: both;
}
```

OUTPUT:

Left Box

This box floats to the left side.

Right Box

This box floats to the right side.

EXPERIMENT 8

PROGRAM:

```
<!DOCTYPE html>
<html>
<head>
  <title>JavaScript Number Operations</title>
</head>
<body>
  <h1>JavaScript Number Operations</h1>
  <script>
    var num = 1234.56789;
    // Find exponential value
    var exponentialValue = num.toExponential(2);
    // Limit decimal places
    var fixedDecimal = num.toFixed(3);
    // Convert number to string
    var numberToString = num.toString();
    // Return negative infinity
    var negativeInfinity = Number.NEGATIVE_INFINITY;
    // Display outputs
    document.write("<h3>Exponential Value (2 digits): " + exponentialValue + "</h3>");
```

```
document.write("<h3>Fixed Decimal (3 places): " + fixedDecimal + "</h3>");
document.write("<h3>Number to String: " + numberToString + "</h3>");
document.write("<h3>Negative Infinity: " + negativeInfinity + "</h3>");
</script>
</body>
</html>
```

OUTPUT:

JavaScript Number Operations

Exponential Value (2 digits): 1.23e+3

Fixed Decimal (3 places): 1234.568

Number to String: 1234.56789

Negative Infinity: -Infinity

EXPERIMENT 9

PROGRAM:

```
email_validation.html
<!DOCTYPE html>
<html>
<head>
<title>Email Validation</title>
<script>
function validateEmail() {
var email = document.getElementById("email").value;
var pattern = /^[^s@]+@[^s@]+\.[^s@]+$/;
if (pattern.test(email)) {
```

```
alert("Valid Email Address!");
return true;
} else {
alert("Invalid Email Address! Please enter a valid email.");
return false;
}
}
</script>
</head>
<body>
<h2>Email Validation Form</h2>
<form onsubmit="return validateEmail()">
<label for="email">Enter your Email:</label><br><br>
<input type="text" id="email" name="email" required><br><br>
<input type="submit" value="Submit">
</form>
</body>
</html>
```

OUTPUT:

email_validation.html

Email Validation Form

Enter your Email:

EXPERIMENT 10

PROGRAM

```
<!DOCTYPE html>
